Belgium, Europe · [+32 485 66 04 32](tel:+32485660432) · adriaandebolle@gmail.com · adriaandebolle.com · [LinkedIn](#)

Lean Six Sigma Black Belt with 8+ years bridging business stakeholders and technical teams across software, cloud, and operational transformation programmes. M.Sc. Engineering (KU Leuven). Certified AWS Solutions Architect.

Experienced in end-to-end requirements gathering, process analysis, functional specification writing, and stakeholder facilitation. My background spans two distinct worlds: large enterprise environments in Life Sciences (Pall Life Sciences / Cytiva) and chemicals/energy (BASF), with hands-on grounding in regulated environments, quality systems, and cross-functional change management; and more recently, building and scaling software products across startups and scaleups, where I have worn every hat from product owner to architect to delivery lead. Both experiences inform how I work: I can engage credibly with business and technical audiences alike, and I understand the full delivery lifecycle from first requirements conversation to production.

Experience

Freelance Consultant / Software & Process - Manengo bv

Jun 2019 - present

Freelance software and (business) process consultancy. Selected projects below.

> Software Integration Lead - Contour Lab

Dec 2024 – Dec 2025

- Managed end-to-end client onboarding for the integration of an AI recommendation engine into fashion e-commerce environments (Salesforce, Shopify).
- Analysed client data flows, and integration requirements; translated into technical specifications and implementation tasks.
- Coordinated between stakeholders to successfully onboard two enterprise clients.

> Software Architect / Product Engineer - CarManager

Jan 2026 - Jun 2026

- Built a B2B vehicle auction platform for Belgian car dealers: real-time bidding, auction management, dealer dashboards, automated vehicle importing and pricing workflows.
- Automated end-to-end operational processes, converted them into structured application workflows.
- Delivered using React, AWS SAM, Supabase, Docker, and containerised services.

> Software Architect - Synt

Jul 2021 - Aug 2026

- Gathered requirements from admins and residents in co-owner associations to build a full management platform
- Analysed administrative workflows and translated them into a web dashboard and mobile app.

> Solutions Architect & CTO - Relotrust

Oct 2019 - Mar 2020

- Designed and delivered a relocation management platform end to end (business analysis, architecture, and cloud delivery).

CEO & Founder - Ubigreat bv

Dec 2021 - present

- Founded two technology products: Matchmaking by Ubigreat (AI event matchmaking) and UNBLND (social discovery platform, 200,000+ users).
- Led business analysis, product strategy, process design, and stakeholder management across both ventures.
- Secured €130,000 in investment; managed investor relationships across the full fundraising lifecycle.
- Selected into imec.istart accelerator. Built business cases, pricing models, and go-to-market strategies.

Teacher (part-time, 45%) - Atheneum Caroline Pauwels, Brussels

Jan 2024 - Aug 2025

- Taught advanced physics and engineering to 'Technologische Wetenschappen & Engineering' students (3rd grade secondary); prepared students to enrol in Engineering or Informatics at VUB.

Value Stream Engineer & Change Manager - Pall Life Sciences / Cytiva - France/Belgium

Mar 2017 - Feb 2018

- Cross-functional liaison between Production, Quality, Sales, and Logistics in a regulated industrial environment.
- Analysed production and logistics processes to identify inefficiencies; redesigned assembly procedures for single-use biocontainers and resolved production disruptions. (PSP, Kaizen, Obeya)
- Automated internal logistics controls using Excel VBA and SAP; coordinated operational change across multiple departments.

Internships

Business Analyst & Software Engineer, BakerOnline

Aug 2018 – Feb 2019

Erasmus for Young Entrepreneurs

Process Engineering & Software Intern, BASF - Ludwigshafen, Germany

Jul 2015 – Aug 2015

Energy optimisation at the EO-plant; built a custom monitoring tool combining process engineering and software. (MES, ERP)

Education

M.Sc. Engineering: Chemical and Biochemical Technology

2011 - 2016

KU Leuven, Belgium · Exchange: Polytechnique de Montréal, Canada (2014 - 2015)

Certifications

Lean Six Sigma Black Belt - SSD Global Solutions, Belgium

2026

Certified in DMAIC methodology and structured process improvement - applied across SpineWise (assessment cycle-time reduction) and Ubigreat (growth experimentation).

AWS Certified Solutions Architect - Associate ([Credly](#))

Skills

Process & PM: Business analysis, requirements gathering, workflow mapping, functional specifications, DMAIC, change management, stakeholder management, business cases, Agile, Product Management

Frontend: React, React Native, Vue.js, Angular, HTML, CSS, Tailwind

Backend: Supabase, Node.js, PHP/Laravel, MySQL, REST API, BFF Architecture

Cloud & DevOps: AWS (SAM, Lambda, Bedrock, S3), Supabase, Docker, Git, DevOps

AI & Vibe Coding: AWS Bedrock, Recommender Systems, Clustering, MCP: Claude Code & Jules by Google, Prototyping w/ Lovable & Base44, GitHub Copilot, RAG: dedicated chatbot services, Agentic workflows

Familiar: Swift, C++, Java, BoxCox, Customer Journeys, Business Development, SAP, VBA, Python, FastAPI, Azure, GCP

Awards & Recognition

imec.istart portfolio company

Green Sharks finalist (social impact entrepreneurship)

YTIIL Transatlantic Innovation Leader finalist

Volunteering

- Flemish workgroup for people with dementia (2022 - ongoing)
- Guardian of unaccompanied refugee minors, FOD Justice Belgium (2016 - 2019)
- Student Buddy Program, KU Leuven (2011 - 2013)

Languages

Dutch  - Native **English**  - C2 **French**  - C1 **German**  - B1 **Spanish**  - A2 **Chinese**  - A1

Additional

Based in Brussels, Belgium · Full right to work in Belgium and the EU
